

VINE®

VINELink Facts

VINELink.com is a web site allowing anyone to search for offender information and register for notification on custody status changes.

Visit www.vinelink.com

Click on your state. VINELink is activated as existing VINE sites move to the new operating platform at Appriss and as new sites come online.

To search for offender information, you will need to know the offender's name. You can also provide the offender's date of birth or give an age range to narrow down your search although these are not required fields.

If you search by the offender's name, you must know the full last name of the offender and at least the partial first name:

"Jones, Mi"

This search will bring up a list of all offenders with the last name of Jones and the first name beginning with "Mi".

You can search the entire state for an offender, or you can search by Department of Correction facility or county jail. If your search returns more than 1 offender matching that name, it will give you a list of those offenders. You can click on the details button next to each offender's name to determine which offender you're searching for. VINELink will provide you with the offender's custody status, custody agency, gender, race, date of birth and the offender identification number.

Following the on-screen instructions, you can register a telephone number or email address for notifications about a change in the offender's custody status.

To register a telephone number, enter the number where you wish to be called — including the area code. You will also need to provide a 4-digit PIN (Personal Identification Number) that you will enter when the system calls you. The PIN will confirm that you received the message from VINE, and will stop repeated calls.

For e-mail notification, simply enter the e-mail address at which you would like to receive the notification. E-mail notifications will only be sent one time, and cannot be confirmed.
